Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: the examiner has considered applicants' amendment filed October 6, 2004. The amendment was sufficient to overcome the rejection of record under 35 U.S.C. 102(b).

Upon further consideration of the rejection of claims 1-5 based upon 35 U.S.C. 103(a), along with further analysis of U.S. 4,460,794 to Fujiyama et al, the examiner now believes that Fujiyama et al constitutes a true teaching away from the instant claims, which recite an amount of hydrogen fluoride from 2.5 to 4.5 mol, since Fujiyama et al expressly state at column 3, line 23, that the molar ratio of HF to the feed alkyl benzene "*must*" be at least 5. Therefore, the examiner finds that it would not have been prima facie obvious to a person of ordinary skill, in view of the express teaching of Fujiyama et al, to modify the molar ratio of HF to include any ratio below 5, and as such, the examiner has withdrawn the 103 rejection. The declaration under 37 CFR 1.132 filed October 6, 2004 has therefore been rendered moot. The instant claims are now allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
